

## Turn your black and white Photos into COLOUR in an instant.

Here's an amazing new web that uses Artificial intelligence (AI) to turn Black and White photos into colour. It so simple. Just upload the photo to the site and wait a few seconds for the magic to happen. Your Photo will appear transformed into living colour right in front of your eyes. Click the download button to return the photo to your computer. It's amazing.

The App called **Deep AI** and its **Totally Free**. Here is a link to the site.

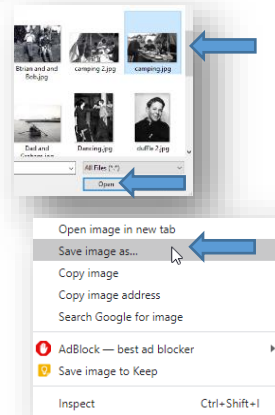

<https://deepai.org/machine-learning-model/colorizer>

Here are the steps to follow to colourise a Black and white photo:-

- Click on the link to open the **Deep AI Image colourisation App**

- Click on the **image** button.
- **File Explorer** on your computer will open.
- **Browse** to the Picture Folder ( or where your photo is filed)
- **Select** a Photo and Click **Open**.
- The Photo will be uploaded to the site
- Within seconds the Photo will be coloured
- **Right Click** on the Photo and select **Save Image**
- In File explorer, choose the location to save the coloured Photo.
- Give the file a name.
- Select **Save**
- Your Coloured Photo will be downloaded to your computer.

With all this time on your hands now is the time to scan your old Black and white Photos and using this great free tool turn them into stunning colour Pictures. However although this App uses artificial Intelligence it can't know what colour dress your Grandma was actually wearing in 1921 but it makes a good stab at it.

**Impress the kids, but don't tell them how you did it. They will think you are an expert in Photoshop.**
